LIBRARY MANAGEMENT SYSTEM

Objective:

To efficiently manage and automate library operations, including cataloging books, managing user accounts, facilitating book borrowing and returning, tracking inventory, and providing search functionality. It aims to streamline these processes for both library staff and users, ensuring organized access to resources, secure data management, and an overall improved user experience.

Features:

- Login or Sign-Up Page
- View Books
- Search
- Add Books
- Delete Book
- Delete Data
- View Orders
- Place Order
- Borrow Book
- Calculate Fine
- Return Book
